The G5 Series of Iridium/GPS collars offer you a range of options depending on your requirements, and your first year's data is free:

The G5 series collars are easily programmed via wireless communication, using the *Wildlink* Comm Module and your PC. You control when fixes are collected and stored, when data is uplinked to the Iridium satellite (up to six per day), and when the VHF beacon will transmit. A geo-fencing feature is easily programmed, and on the model G5-2D, *Neolink* neonate monitoring is available.

Your collar's GPS location data is downlinked and stored on ATS' managed website, atsidaq.net, where it's available to you anywhere you access the internet. SMS Text message alerts can be sent on mortality, geo-fencing and *Neolink* (G5-2D only) events. Using the website you can also remotely command on-the-fly program changes to the collar's fix rate and mortality schedule, fix duration time, and Iridium transmit interval.

The collar features an integrated VHF beacon transmitter. A collar release mechanism can be added to your collars at nominal cost. G5 series collars cannot be refurbished. Your first year's data is included in the collar price. Data fees are billed yearly thereafter.

- Receive SMS text alerts on programmed events such as mortality, animal outside fence, and fawn birth (G5-2D only)
- 100% wireless operation for excellent reliability
- Remotely modify location and data transmission schedule via managed website
- Receive up to 24 locations per day, up to 6 Iridium data downloads per day
- Life calcs based on VHF on 8 hrs/day, 6 locations/day, uplinked every 2 days
Large Data Transmission Capacity - Receive animal location data via website, up to 24 location fixes per day, up to 6 downloads per day. Data files include: latest location, aggregate location since deployment (both .txt), and Google map compatible (.kml).

Programmable GPS Sampling Rates - User programs the number of fixes to collect per 24 hour period in one hour increments, and the calendar days of the year on which to collect fixes. Program may be remotely modified via website.

Standard VHF Beacon Included - VHF transmitter is user programmable on a daily on/off hourly schedule. The minimum on time is one hour per day. Turning off the VHF transmitter during periods when it will not be monitored saves power, enabling longer battery life.

Windows® Based Collar Communication Software Included - Software is used to program the collar location fix rate, VHF beacon and duty cycle. Compatible with most MS Windows® OS’s. Changes to program may also be remotely commanded on-the-fly via the ATS Iridium website.

Activity Sensor Included - Records movement percentage since the last GPS coordinate was recorded.

Mortality Sensor Included - Allows the researcher to know when the animal has not moved within a 4, 6, 8, 10 or 12 hour time period. The mortality schedule may be changed via website command. Mortality notifications are sent via e-mail or text. 

Ambient Air Temperature Sensor Included - Records external temperature each time a GPS location is acquired, accurate to ±2 degrees Celsius with resolution to one degree.

GPS Engine - GlobalTop Ivory Series MT3339 Engine.

G5 Series Iridium/GPS Collar Specifications

LIFE
Typical life is variable; factors affecting life include number of GPS fixes per day, number of Iridium data transmissions per day, visibility of GPS and Iridium satellites, and VHF on-time per day.

MEMORY
- On board data storage
- Datum = WGS84
- 256K nonvolatile data storage memory (64,000 GPS locations)

PHYSICAL

• G5-2A
  - Weight: 250 grams, @ 26 cm mean circumference (.55 lbs.)
  - Size: Electronics, lower 58 x 50 x 24 mm; upper 83 x 47 x 30 mm
  - Case Material: Molded plastic, waterproof
  - Battery: 2 each “AA” size
  - Collar Material: Sized to your specification using 4 cm wide (1 1/2”) Neoprene belting, within a 26 cm to 52 cm range of circumference

• G5-D
  - Weight: ~500 grams (1.1 lbs)
  - Size: Electronics, lower 70 x 50 x 47 mm; upper 83 x 47 x 30 mm
  - Case Material: Molded plastic, waterproof
  - Battery: 1 each “D” size
  - Collar Material: Sized to your specification using 6 cm wide (2”) Neoprene belting, within a 31 cm to 102 cm range of circumference

• G5-2D
  - Weight: ~700 grams (1.5 lbs.)
  - Size: Electronics, lower 73 x 69 x 55 mm; upper 83 x 47 x 30 mm
  - Case Material: Molded plastic, waterproof
  - Battery: 2 each “D” size
  - Collar Material: Sized to your specification using 6 cm wide (2”) Neoprene belting, within a 31 cm to 102 cm range of circumference

Ordering Information
Specify collar circumference and VHF frequency range. The Wildlink Comm Module, PN 17621, is required, available at nominal charge.

WARRANTY
G5 Series GPS collars are covered by a limited warranty for one year from time of shipment, or up to the calculated minimum battery life, whichever occurs first. Collars may not be refurbished.
